Major SAP Instances

SAP Production System	Active Users	S4 HANA Deployment
ECC S/4(Commercial)	~40,000	S4 1909 Completed in January, 2022
ECC (Nypro)	~3,000	Planning in process
ECC (Healthcare P02)	~5,000	Planning in process
BW	~2,300	Not planned
GRC	~11,000	Server migration completed – Upgraded to AC 12.0 SP14 May 2022
MDG	~2,000	Upgrading to S4 (Project in progress)
SOLMAN	~900	Not planned

GRC Focus

Quarterly review on version and SP available

GRC team will consider installing support packs on a regular basis, so that all aspects within the GRC server are working accurately and efficiently, while providing information in a timely manner.

User Access Review

Jabil is currently implementing the User Access Review module within Access Control. UAR utilizes the standard GRC workflow, automates the process of the required user access review, and executes modifications to users' access in SAP as needed.

Firefighter Log Review

Replacing the manual firefighter log review with the GRC standard firefighter log review workflow. Will remove the possibility of errors that can occur in a manual review.

Critical Transaction Review

Replacing the manual critical transaction review with the GRC standard workflow review. Includes the regular review of critical transactions, much like the annual SoD review.

Critical Transaction Review

Replacing the manual critical transaction review with the GRC standard workflow review. Includes the regular review of critical transactions, much like the annual SoD review.

GRC Roadmap

Future Objectives

- Investigate the extension of SoD review risks to systems that interface with SAP
 - Coupa – currently done manually
 - MDG – currently done manually only for access in MDG
- Consider adding more risks to our AVM environment
 - AVM currently monitors 53 of our 93 risks.
- Explore the use of other modules within GRC
 - Process control
 - Continuous control monitoring
 - Expand Business role management
