About the Session

In this session we will discuss some scenarios where the benefits of provisioning SAP access using an IAM solution outweigh that of GRC solution, as well as other scenarios where provisioning access using the Business Role concept (of the access control / GRC) solution are more beneficial than that of the IAM solution.

Gain an understanding of the advantages / disadvantages of each solution for user provisioning and user access reviews with an understanding of your organisation's business objectives, be in a position to recommend the most appropriate provisioning strategy for your organisation
