

Transform your Data Strategy with Data Mesh, Data Fabric, Data Spaces, Data Marketplaces!

Tina Rosario, SAP

SAPinsider
2023

Ensure governance, security, privacy and high quality throughout the data lifecycle

Have a flexible technology foundation serving a business operating model that can change quickly

BUZZ WORDS & BREAKTHROUGHS

Data Mesh

- Business Domains
- Distributed Data Products
- Empowerment, Autonomous, Decentralized

Data Fabric

- Comprehensive
- Modern Architecture
- Integration Scenarios
- Active Metadata

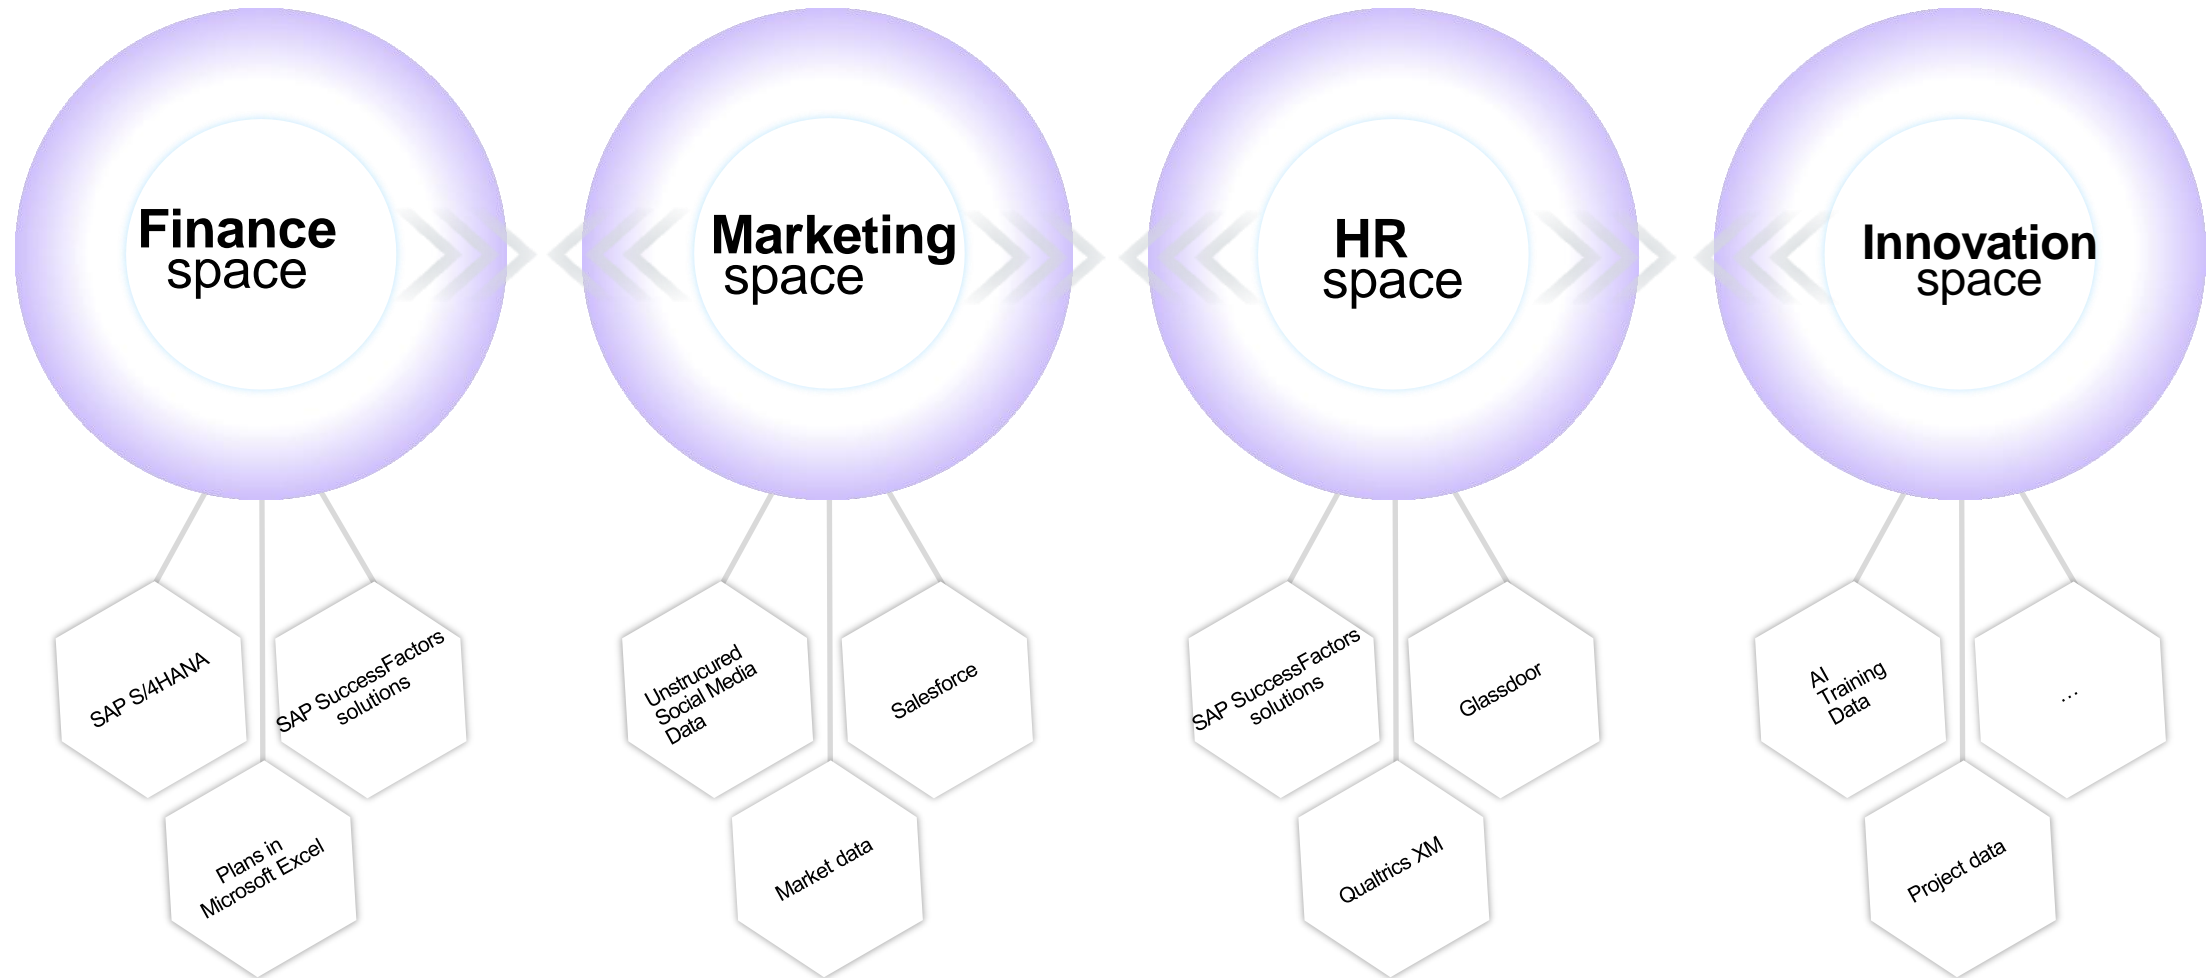

Data Centralization

- Common Platform
- Ease of Access – one stop shop for all products
- Quicker Decisions

Data Democratization

- Scaled data driven decision making
- More than “tech”
- Often is a strategic shift
- Enables data mindset

Spaces provide the business with the right mix of data products

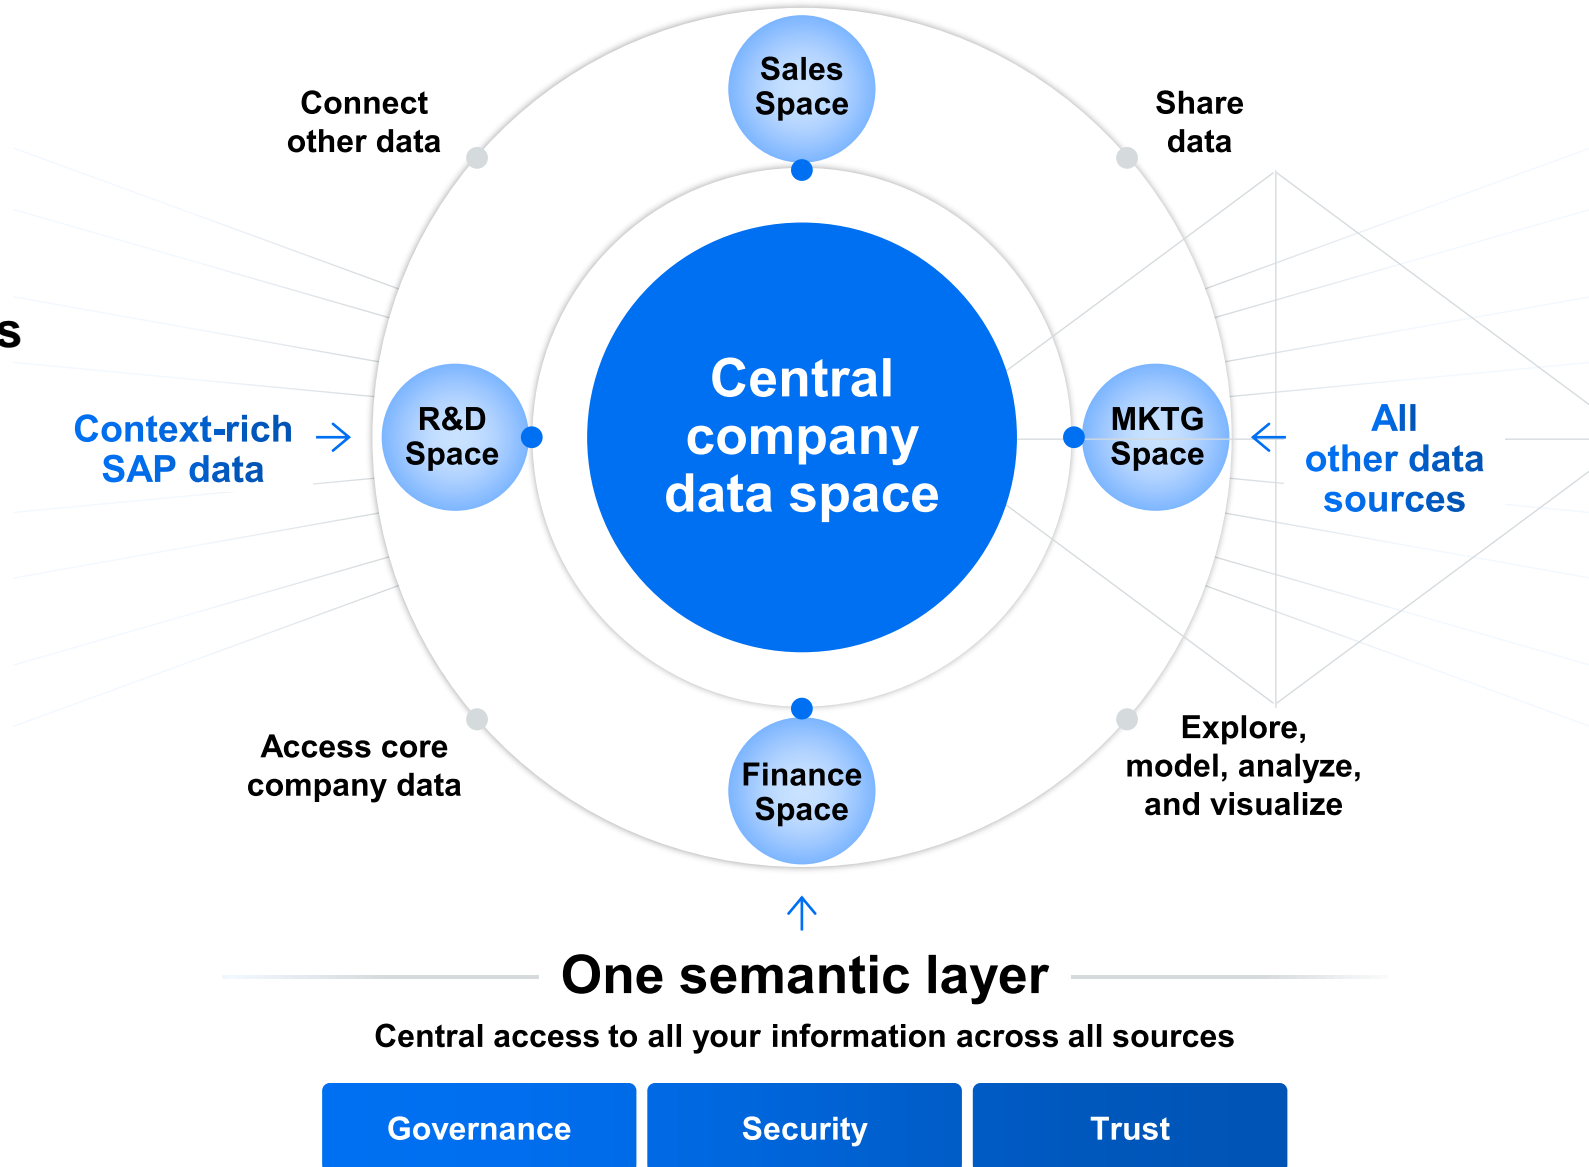

Simplify the data landscape

Enable self-service data product access with open integration

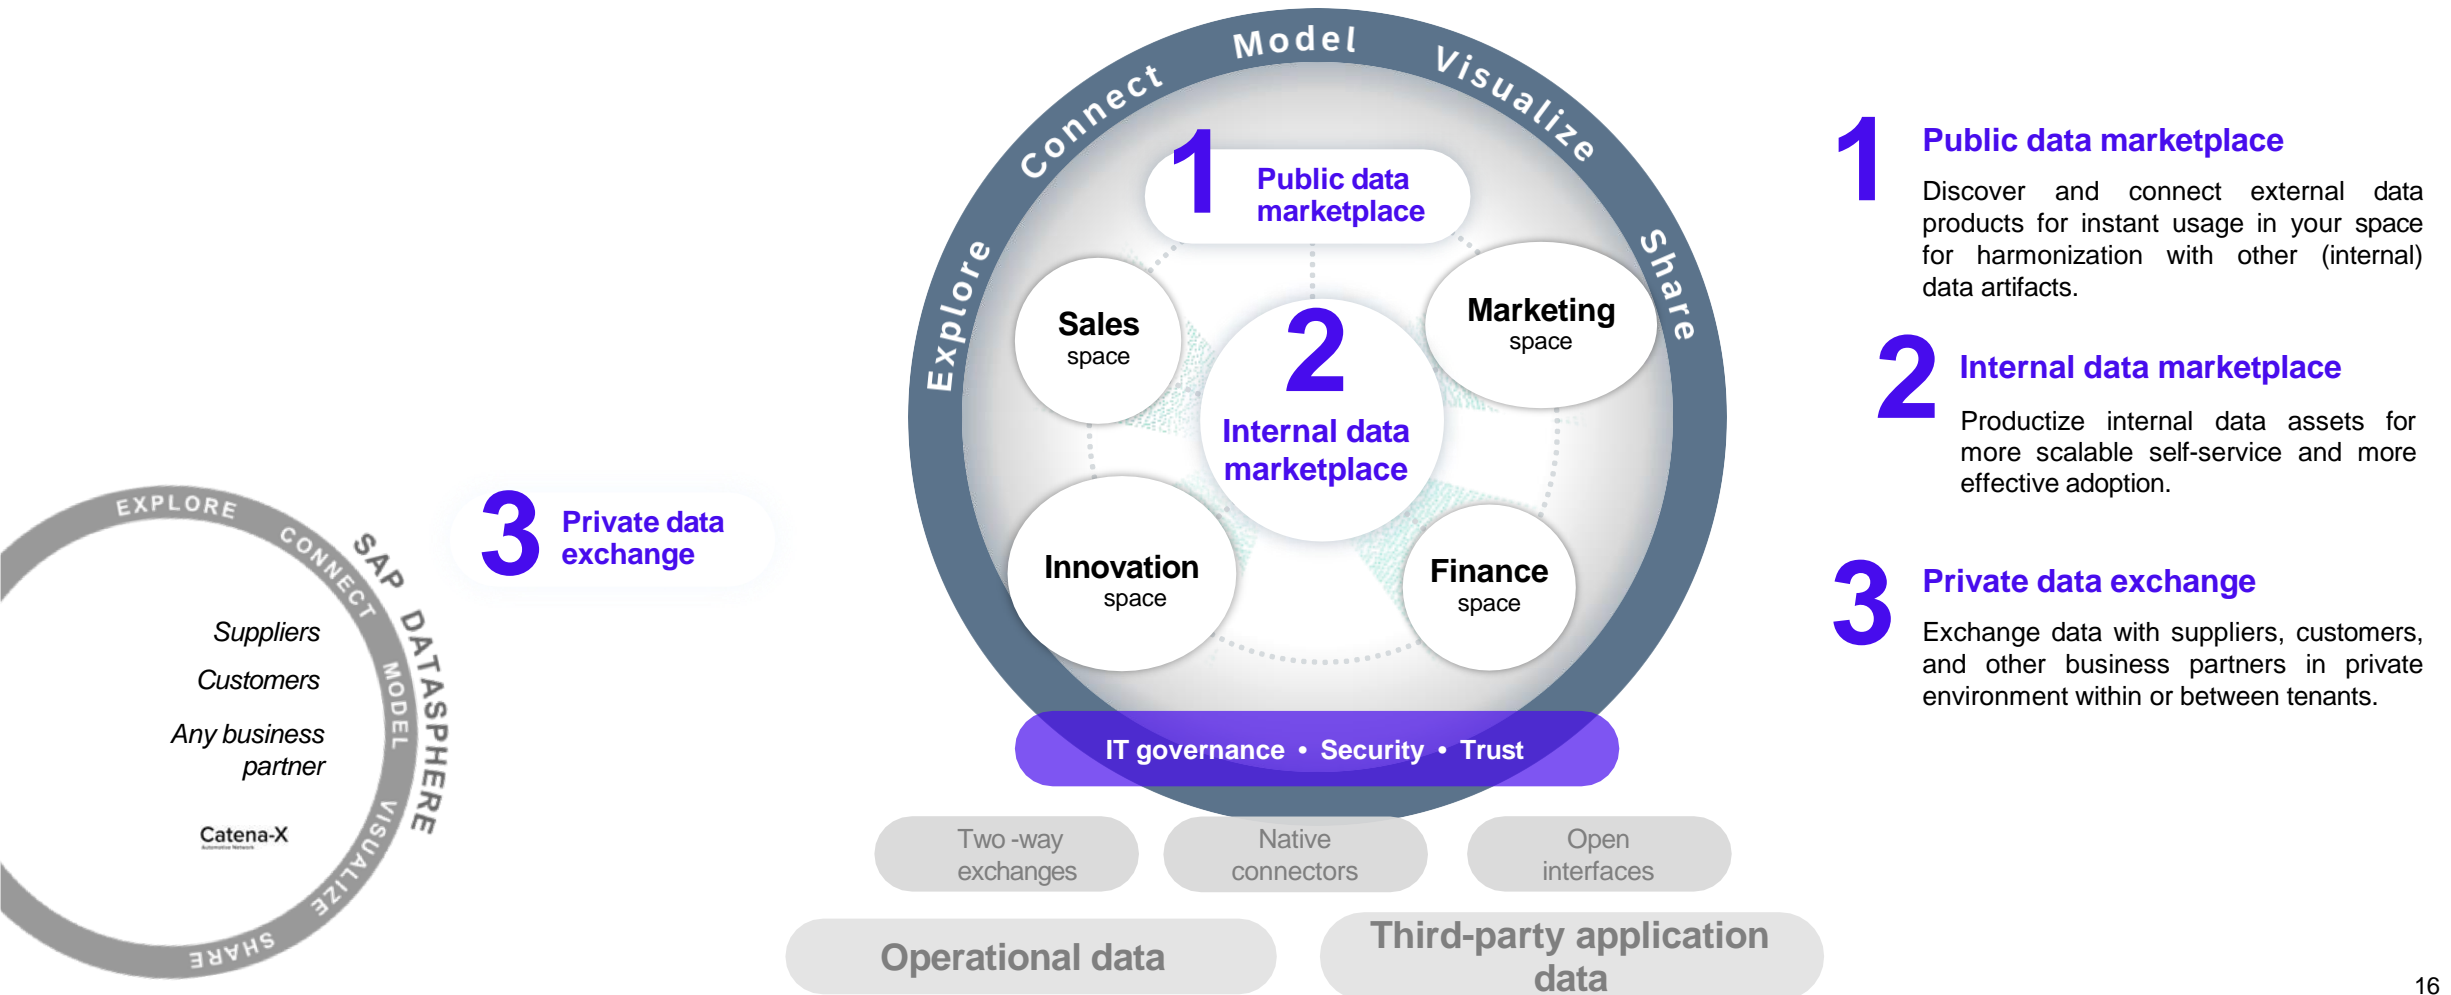

Provide user-friendly access to data products that organize and manage data for different lines of business with spaces

Implement powerful data preparation with complex transformations

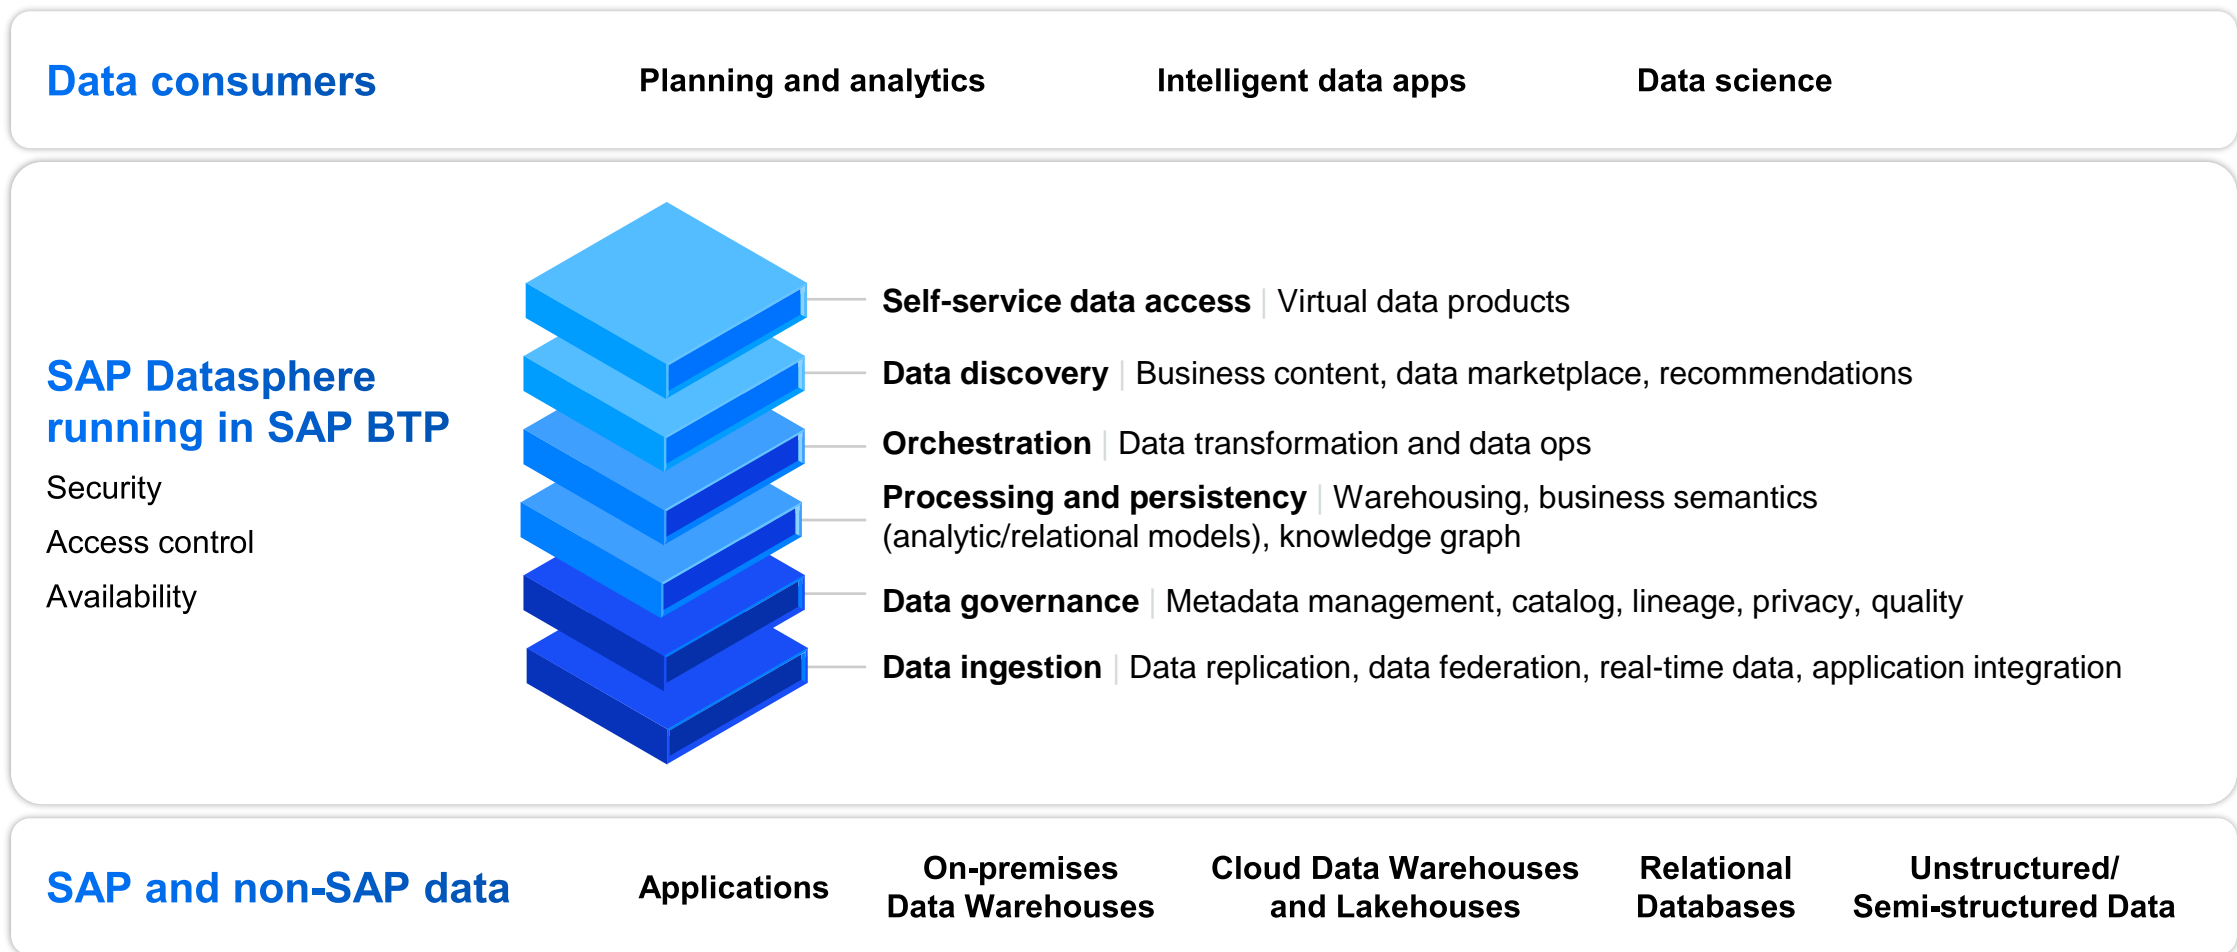

Access data via tools, connectors and open interfaces

Data Marketplace - better, faster, and more scalable data collaboration

SAP Datasphere is the foundation for a business data fabric architecture

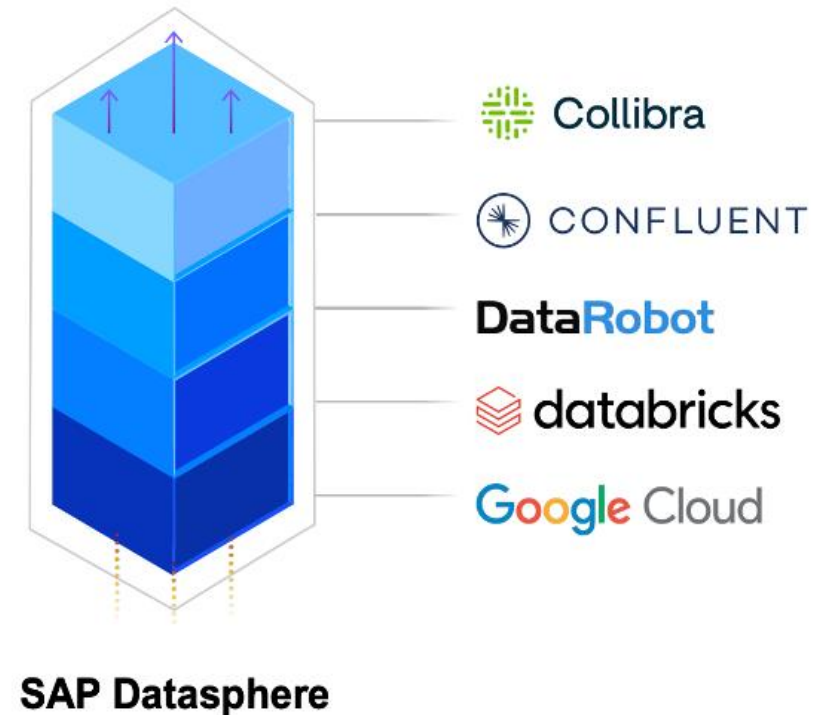

Expansion of capabilities through partnerships

Integrate with industry-leading data and AI platforms to capitalize on data investments

Bring SAP and non-SAP data together leveraging tailored integration with solutions from open data ecosystem partners

Reduce integration complexity

Get an integrated view of information regardless of where it is stored or how it was designed

Transform your Data Strategy with Data Mesh, Data Fabric, Data Spaces, Data Marketplaces!

Thank you.
