# What is SAPUI5?

- Started in 2008, launched for customers in 2012
  - A little over a year later, OpenUI5, the open source version, was launched
- Uses a model view controller concept
  - Models contain the data
  - Views contain (visually show) the data
  - Controllers handle the data (and user interaction with said data)
- All encompassing framework that helps you build your frontend from routing to data binding to testing and more.
