Principles to guide our digital future

1. Data is core business
2. Maximise enterprise platforms
3. Digital uplift
4. Business-led change
5. The way we work

SAP System Usage

1. Manage all assets (incl. asset master data)
2. Manage all statutory / compliance activities related to city assets
3. Manage asset condition assessment programs
4. Manage preventative maintenance (incl. maintenance contracts) using SAP maintenance plans
5. Manage corrective maintenance
6. Manage asset related works conducted by service providers
7. Record all maintenance work completed on CoGC assets including leased assets

Reason for change / Project leverage

1. End of life for current mobility system
2. Improve asset visibility
3. Breakdown operating silos
4. Centralise asset information
5. Standardise maintenance management practices
6. Capture OPEX costs

Project Overview

1. Business engagement (user requirements)
2. Procurement process to find new solution
3. Solution implementation
4. Training

Challenges

1. Organisational restructure
2. Maintenance management Alignment
3. Core EAM Usage

Challenges

1. **Organisational restructure**
2. Maintenance management Alignment
3. Core EAM Usage

Challenges

1. Organisational restructure
2. **Maintenance management alignment**
3. Core EAM Usage

Change Readiness

Challenges

1. Organisational restructure
2. Maintenance management alignment
3. **Core EAM Usage**

Learnings

1. There are no silver bullets
2. Validate user requirements
3. Change readiness

Learnings

1. **There are no silver bullets**
2. Validate user requirements
3. Change resistance

Learnings

1. There are no silver bullets
2. **Validate user requirements**
3. Change resistance

Learnings

1. There are no silver bullets
2. Validate user requirements
3. **Change resistance**

After Action Review

1. What went well?
2. What didn't go well?
3. If we could start over, what would we do differently?
