Olam Agri

We have over 35 years of experience in supply chains across the world with foundations built from our on-the-ground presence in Asia and Africa.

Our operating capabilities in global origination, processing, trading, logistics, distribution, and risk management set us apart from our peers. While our strategic manufacturing assets in key destination markets strengthen our service to customers

Sustainable Growth

We offer our farmers, our customers and every member of our global supply chains, a robust, and forward-looking approach to worldwide food, feed and fiber distribution.

Our global practices are firmly rooted in experience and understanding second to none.

Chief Digital and Information Officer, Olam Agri

“Our goal with the implementation of this new technology is to drive greater agility and innovation within our organization and ensure that we are well placed to meet the evolving needs of our customers and all other stakeholders.”

OLAM SAP Transformation to the Cloud

Scalability

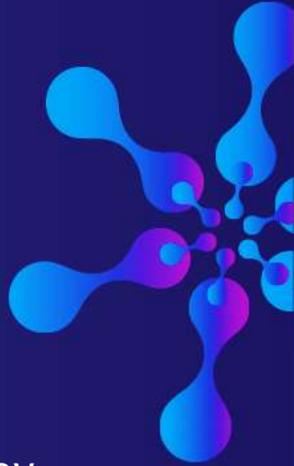

- Exponential Organic and inorganic growth
- Quick Scale up with long term visions to grow the company
- IT systems to handle multiple x times of growth with business at speed

Operational Excellence

- Commodity Business – speed and agility is key
- Transformed systems allows faster development cycles to improve efficiencies in business operations

Governance Risk Compliance

- Enhance financial outcomes by minimizing controllable inefficiencies and leakages
- Risk management and catch anomalies and RISK carry in the books at any time
- Diverse geographies – minimise controllable losses

S/4HANA cloud migration with AWS for :

Immediate Benefits

- Set for 2X growth, cloud enables us to scale the system quickly and without limits
- Segregation from the rest of Operating Groups makes us ready for potential divestment
- Limited but new functionalities will be introduced which will make our processes more efficient (e.g., financial simulation, faster and easier reporting, real-time MRP, Faster Month close)
- Internal IT team can focus more on business functionality improvement as infrastructure management will be done by SAP

Future Benefits

- Ability to introduce latest technology innovations from SAP R&D team (150+ Gen AI based screens, sustainability ledger)
- Ability to review and optimize business processes continuously
- Implement new processes/solutions. E.g.
 - Reduce Days in inventory - First Expiry First out
 - Improve Sales days outstanding - Sales Rebate Management
 - Risk Monitoring – Sanction Screening, Customer Scoring and Limit determination

Systems in Scope for Transformation enabled through *MINDSPRINT*

Systems that will migrate to S/4HANA RISE Platform	SAP GT (ECC EhP7)	Document Management System	Web Dispatcher
	BTP Cloud Connector	Snowflake JCO instance	Dedicated Gateway (EMP) to embedded Gateway
Systems that will remain On Premise	BW/BOBJ/BPC	S/4HANA v2020	Solution Manager
	Governance, Risk and Compliance (GRC)	SAP TDF/NFE*	Brazil PO
